Dado Designs go Dutch

Elegant Australian DADOquartz provides centerpiece for five star hotels.

Using the latest technology to manufacture quartz bathtubs and basins, DADOquartz is renowned for its elegance and durability.

Proving its designer cachet, the **Manna Hotel in Nijmegen** in the Netherlands selected the Moloko bath and Anelle pedestal basin to furnish the bathrooms of their five star hotel.

A modern look is given an added touch of luxury thanks for the contrasting natural stone finish against the glass and black tiles.

Some suites chose to make the bath the centerpiece of the room, integrating the sturdy white basin into the bedroom space.

With their high resistance to scratching, solidity and durability (they come with a twenty five year warranty) – DADOquartz is an excellent choice for first class hospitality.

Being both non-porous and UV resistant, the designs are as practical as they are elegant.
